

Abstract zur 12. Dresdner Körperbildwerkstatt

„Grundlagen der Körperpsychotherapie“

25. & 26. November 2011

WORKSHOP F5

CHANGING BODY ATTITUDE OF PATIENTS WITH SEVERE SOMATOFORM DISORDER

HANNEKE KALISVAART & SONJA KLEMM (ZEIST, NL)

Patients with severe somatoform disorder have difficulties understanding and accepting the experiences of their body. At Altrecht Psychosomatic Medicine in the Netherlands, these patients receive multidisciplinary treatment with the body as principal focus. As a practical continuation of the research results presented on Friday, this workshop will explain and show the possibilities of body psychotherapy to ameliorate body attitude.

(Die Diskussionsrunde im Workshop findet in deutscher Sprache statt.)
